Evolution to install Dual Play Roulette for Casino Malta

Evolution Gaming, leading provider of Live Casino solutions, has announced that it has signed an agreement to install a bespoke Dual Play Roulette table at Casino Malta by Olympic Casino, the island's newest and largest land-based casino.

The Dual Play table, set within a five HD camera rig to allow on-premise and online players to play together at the same table, is expected to go live in Q3 this year. It will be located on the main gaming floor and will open 24 hours a day, seven days a week.

Operated by Olympic Entertainment Group, the leading provider of gaming services in the Baltic States, Casino Malta was established in cooperation with Eden Leisure Group, the Maltese hotel and entertainment enterprise. The casino in St. George's Bay, St. Julian's, boasts 285 slot machines, 29 table games and Las Vegas style entertainment.

Explaining the decision to select Evolution Dual Play, Simon De Cesare, CEO of Eden Leisure Group, said: "Evolution has an enviable track record and reputation of working with the leading land-based casinos to deliver customised, truly convergent solutions. We wanted our players to be able to play at one of their favourite Casino Malta Roulette tables even when they are not able to visit our casino in person or be at the actual table. Evolution Dual Play Roulette was the go-to option to enable that level of extended service and the customisation flexibility we required."

De Cesare added: "Just as importantly, Evolution Dual Play is a convergence solution that works as part of the existing set-up and procedures of our land-based operations."

James Stern, Evolution's Director of Business Development & Land-based Sales, commented: "We are delighted to be working with Casino Malta for the first time. Casino Malta was keen to extend the ability to play at their land-based venue to a much wider audience. Given the popularity of Malta as a holiday and short-break destination, that wider audience will include, of course, the very significant number of ad hoc players who play at the casino when visiting Malta. Now, following the installation of the Dual Play table, those players will be able to continue to play at Casino Malta when they return home."
